Benefits of high definition (HD) over standard definition (SD) include:

1. Better screen resolution, which translates to better image quality,
2. Larger, undistorted pictures (no empty black areas to the sides of the picture),
3. Better sound quality!

WHAT TO DO IF A PERSON FALLS UNCONSCIOUS (see BLS flowchart below):

1. Ensure you are not in danger (e.g. exposure to electricity or carbon monoxide)
2. Call for help (911 and/or for bystander)
3. Check for responsiveness verbally, and if not, to a painful stimulus. If no response, then...
4. Start chest compressions (fast and hard! >1 per second)
5. *In suspected opioid overdoses and children, give 3 small rescue breaths before compressions. Attempt to open airway with Chin Tilt Maneuver (*bottom image*)
6. Continue CPR and ventilations at ratio of 30:2 (meaning, after thirty compressions, give two rescue breaths)
7. Reassess patient and quickly return to compressions/ventilations (#4)

Chin tilt maneuver to open a person's airway (helps airflow for rescue breathing):

- 1) Tilt head back
- 2) Pull chin up
