**WHAT TO DO IF A PERSON FALLS UNCONSCIOUS** (see BLS flowchart below):

1. Ensure you are not in danger (e.g. exposure to electricity or carbon monoxide)
2. Call for help (911 and/or for bystander)
3. Check for responsiveness verbally, and if not, to a painful stimulus. If no response, then...
4. Start chest compressions (fast and hard! >1 per second)
5. \*In suspected opioid overdoses and children, give 3 small rescue breaths before compressions. Attempt to open airway with Chin Tilt Maneuver (*bottom image*)
6. Continue CPR and ventilations at ratio of 30:2 (meaning, after thirty compressions, give two rescue breaths)
7. Reassess patient and quickly return to compressions/ventilations (#4)

**Chin tilt maneuver** to open a person's airway (helps airflow for rescue breathing):

- 1) Tilt head back
- 2) Pull chin up
