This is a list of our TV station counts for many USA cable and satellite TV providers and is compared to those reported.

Duplicate channels were removed when tallying the count. Overall, there really isn't much difference except for Dish Network, which has many more international channels (350). Oddly, almost all providers have more channels than they claim.

We make printable TV channel lineups for viewers of cable, satellite and streaming TV in the USA and Canada. We take great pride in making them accurate and easy to use. The whole idea is to make life easier by seeing what we pay for (in hardcopy). It all started after a simple request by my elderly dad to see his channels. Thanks Pops!
