IF A PERSON BECOMES UNCONSCIOUS:

1. Ensure you are not in danger (such as exposure to live electrical wires, smoke or carbon monoxide)
2. Call for help (911, bystander and AED (defibrillator) if possible)
3. Check if responsive to *voice*, and if not, then to a *painful stimulus*. If not, then...
4. In a suspected opioid overdose or for children, open the airway with the chin tilt maneuver (bottom image). Pinch nose and give 3 rescue breaths and then...
5. Start chest compressions: In the middle of the chest with palm facing down and a straight arm, push fast, deep (1 inch at least) and hard. Do more than 1 compression per second.
6. Continue compressions and ventilations at a ratio of 30:2 (after 30 compressions, give 2 breaths)

© 2019 eMedCert

Chin Tilt Maneuver (to open airway):

- 1) Tilt head back
- 2) Lift chin up and out
- 3) Create airtight seal (pinch nose, mouth seal)
- 4) Give slow breaths

*This information is purely an aid and not medical advice. Consult your doctor for details. See for more at <https://www.acls-pals-bls.com/algorithms/bls/>
